

Manual Testing for URMH interface login:

Test:

- 1. Enter a non-existing username/password and log in.
 - Expected result: Error message pop-up. "Wrong username or password!"
- 2. Do not enter anything and attempt to log in, or only enter one of the following: username or password.
 - Expected result: Error message pop-up. "Username/Password cannot be empty!"
- 3. Enter a correct existing username and correct password:
 - Expected result: Message pop-up. "Authenticated. Hello **name**!" where name is the name of the user pulled from the database.
- 4. Fill in both fields, but enter either your username or password incorrectly.
 - Expected result: Error message pop-up. "Incorrect username and/or password."
- Test user:
 - Username: text@example.com PW: password
